

IMaSS EVENT PROGRAM FOR YEAR 2016

IMaSS 1 day Workshop

MALDI/MS in lab routine: an update on microorganisms ID

Padova, 27/01/2016, Torre della Ricerca, IRP

Congress dedicated to microorganism Identification with MALDI-MS techniques.

Mass spectrometry has revolutionized the way that microorganisms are analyzed and identified in clinical diagnostic routine. Recently MALDI-MS provides rapid, accurate and inexpensive method for bacteria, mycobacteria, yeasts and fungi identification in microbiology labs. This one-day meeting will be focused on the technological and applicative aspects of the technique, also hoping in a better interaction between microbiologists and mass spectrometrists.

IMaSS Patronage to

34th Informal Meeting on Mass Spectrometry

Trento, 15-18/05/2016, Auditorium of Fiera di Primiero

IMMS will cover, as usual, all aspects of mass spectrometry. The spirit of IMMS meetings is to report the most recent researches in mass spectrometry and to give young scientists the opportunity to present – sometimes for the first time in their life – their results at the international forum and to discuss them, in a friendly environment, with experienced scientists in mass spectrometry.

**TO PROMOTE THE PARTICIPATION OF YOUNG SCIENTISTS TO THIS EVENT,
IMASS HAS ORGANIZED 8 SCHOLARSHIPS.**

IMaSS 1 day Congress

New trends in mass spectrometry: News from ASMS 2016

Firenze, 20/06/2016, Palazzo dei congressi, Piazza Adua

We decided to offer to all operators of mass spectrometry a day-event that will be presented by all the industry of the sector, to show the latest news on tools and technologies already illustrated fifteen days prior to the congress of the American Society of Mass Spectrometry (ASMS) for the year 2016 in San Antonio.

IMaSS 1 day Congress

Mass Spectrometry Scientific Incubator:

A day for presentation of data and ideas: mass spectrometry forum for young researchers

Torino, 20/07/2016, Università di Torino

IMaSS wants to organize an informal day event, free of charge and open to everybody, to give a chance to present their work (in the form of posters, presentation or even oral communication) to the Italian scientific community. In this way we would like to encourage and introduce the young researchers and students to the world of congresses and scientific workshops, in a more informal setting of other meetings.

IMaSS 2-day School

1st IMaSS Data Analysis School

Torino, 21-22/07/2016, Università di Torino

This school will cover the main aspects of mass spectrometry data handling and analysis, from data generation to the conversion and treatment on proprietary and free softwares. The course will include practice lessons with example data to re-elaborate. The school will put the focus on multivariate analysis for treating -omics data.

IMaSS 1 day Congress

Forensic Mass Spectrometry: Verona 2016

Verona, 11/11/2016, Università di Verona

This event will be focused on mass spectrometry applications in forensic field. International guest and experts in this sector will be hosted to presents the latest news in forensic field.

**... and many other events and schools
will be added in the following days!!!**
